## CLARIFICATION NO 3

### **RFB REF: KE-KRA-469929-GO-RFB FOR SUPPLY, DELIVERY, INSTALLATION, COMMISSIONING AND MAINTENANCE OF BODY WORN CAMERAS AND RELATED SYSTEM**

#### **CLARIFICATION TO THE REQUEST FOR BIDS**

Reference is made to the tender mentioned above. Bidders' attention is drawn to the Instructions to Bidders clause no. 7.1 on clarification of bids in the bidding document.

Kenya Revenue Authority wishes to inform prospective bidders of the following clarification:

No.	ACTIVITY/QUERY	CLARIFICATION
	<b>TECHNICAL EVALUATION CRITERIA, Table 6, for the DATA DOCKING STATION.</b>	
	In Table 6, it is stated that the docking system for the body-worn cameras should "automatically acquire data from the body-worn cameras and automatically upload the data to the central data management platform based at headquarters for management and storage while charging the cameras."	
	To properly assess the feasibility of implementing this automatic data upload to the central management platform and to ensure our proposed solution fully meets KRA's requirements, we kindly request further clarification on the following technical aspects:	
1.	Data Transmission Path: Could you please specify the intended data transmission path for the automatic data upload from the docking stations to the central data management platform? Specifically, we need to understand whether the data transmission is expected to occur via an internal network, an external network (internet), or another specified method.	<b>The data will be transmitted through an existing KRA network infrastructure</b>
2.	Technical Documentation: We would greatly appreciate it if you could provide us with detailed technical documentation related to the central data management platform and the data docking station interface requirements. This documentation would be crucial for our engineering team to evaluate the integration and ensure seamless data transfer.	<b>KRA has no existing body worn camera system and therefore bidders are required to propose an end-to-end solution. The solution will run on the existing KRA network infrastructure</b>

***Tulipe Ushuru, Tujitegemee!***
